

Please stay support on closed captioned television as we the deaf and hard of hearing rely on communication and improve the knowledge of everyday life as much as hearing people. We felt that we are no longer second citizen because of the void of barrier of language. If drop out closed captions and we may move back into 2nd citizen person due lack of knowledge and may created highest tax to support our life that left us out and prevent us move along with hearing people life. Lack education due to no closed captions created us poorest citizen and force tax to support our live.
